Experienced SAP technical specialist with over 3 years of SAP MES/MI–specific consulting experience. competent in all aspect of developing, implementing, improving, upgrading, and optimizing MES. has expertise in developing SDKs and SAP MES features. They are also skilled in developing new technologies such as BTP and DM.

Key Points

- Proficient in SAP MES functionality, including SDK development for various DCs such as HOOK, POD–PLUGIN, STANDLONE, SERVICE, SERVICE, EXT, Web–Services, and Non–UI Plugin with expertise in creating orders, configuring master data, and defining routers to streamline manufacturing processes.
- Specializes in SAP MEINT customization using custom XSLT and deploying custom workflows for operational efficiency.
- Experienced in SAP MII implementation, covering end–to–end projects, plant connectivity, and workbench development using SAPUI5, SAP HANA, and other technologies.
- Proficient in quickly understanding complex logics, reducing system slowness, and adept at handling very complex tasks while swiftly mastering new technologies.
- Skilled in Releasing Orders, Checking Order Details, PO validation, and more in SAP ECC
- Played a pivotal role in end–to–end project development, specializing in existing project enhancement, implementation, rollout, and upgrade projects for SAP MII/MES Projects
- Collaborated with clients to enhance existing SAP MII/MES application systems. Converted complex logics in SAP MII to SAP MES, improving system speed and loading time.
- Led enhancement projects focusing on SAP UI5 screen upgrades, reducing BLS execution slowness, and took responsibility for crucial aspects of go–live activities, UAT, scheduling, and development pre–planning

Achievements

- Earned the "Performance Award" in 2024 by IBM, recognizing exceptional performance and contributions to project success.
- Received the "Shining Star Award" in 2022 for outstanding support, including training juniors and building a cohesive team.
- Received client recognition for our team's exceptional support, timely bug fixes, and successful solution delivery during critical go–live periods

Experience

- Application Developer – Sap NextGen Manufacturing
IBM India Pvt Ltd, Dec 2022 – Present
- Software Engineer
RITS Consulting and Technologies Pvt. Ltd, Jun 2021 – Dec 2022
